

# Classic Imaging®

## Classic PalmScan

- Palm-top ultrasound  scanner
- High resolution sector  scanner

The PalmScan is a small and convenient scanner for general small animal abdominal, reproductive and basic heart imaging. Good quality imaging packaged in a practical housing that allows instant imaging under any circumstance.

The PalmScan is very easy to learn and to operate and offers the regular imaging modes such as single and dual B-mode imaging, M-mode and B- and M-mode imaging. On a single battery load the unit will operate continuously for approximately 2 hours.

The unit is attractively priced and is ideally suited for the starting practice or as the "all-round" extra or back-up unit for the larger practices.

### Specifications:

Transducer <input type="checkbox"/>	3.5 MHz and 5 MHz
Monitor <input type="checkbox"/>	TFT 5" LCD
Display mode <input type="checkbox"/>	B-, B/B-, BM- and M-mode
Grayscale <input type="checkbox"/>	256 levels
Zoom factor <input type="checkbox"/>	1, 1.2, 1.5 and 2
Annotation <input type="checkbox"/>	Numeric ID, age and sex
Measurement <input type="checkbox"/>	Distance and area/circumference
Power supply <input type="checkbox"/>	DC
Power consumption <input type="checkbox"/>	17 VA
Battery capacity <input type="checkbox"/>	2 hours operation
Adapter <input type="checkbox"/>	110/220 V, 45 VA
Weight <input type="checkbox"/>	Mainframe 600 grams
Dimensions <input type="checkbox"/>	149 x 122 x 42 mm (W x H x D)
